

Quartz is a hard, crystalline mineral commonly formed in geothermal waters. It is present in many igneous and metamorphic rocks, occurring when quartz-rich sandstone or chert has been exposed to high temperatures and pressures. Such conditions fuse the quartz grains together forming a dense, hard, equigranular stone.

Nimbin Quartz Cobblestones are characterised by a blend of warm whites, light coppers and gold tones with the shimmer of quartz.

These cobblestones are an artisan crafted stone with split edges to achieve an organic and textural aesthetic.

NOTE: Shade/batch variation is an inherent characteristic of all natural products. The colour of the material supplied may vary to samples/images provided.

FORMATS

Cobblestones:
90 x 90 x 20mm (+-2mm)
400 x 400 x 20mm sheet size
Custom sizes available

APPLICATIONS

Interior Walls	Yes
Exterior Walls	Yes
Interior Floors	Yes
Exterior Floors	Yes
Splash Areas i.e. shower walls and splashbacks	-
Wet Areas i.e. shower floors, baths and pools	-
Countertop	-

INSTALLATION + CARE

Sealing may be required. We recommend Chemforce Stain Protector™.

For routine cleaning of internal natural stone surfaces we recommend Chemforce 5+5™ Enzyme Cleaner Concentrate.

For routine cleaning of external natural stone surfaces we recommend Chemforce Oxytec-M™ Oxygen Cleaner.

NOTE: Detailed technical data, installation and cleaning guides are available upon request.
