

Limestone is a sedimentary stone that is formed in warm, shallow marine waters over millions of years. Composed mostly of calcium and fragments of marine organisms such as coral and shells.

The Myra Beige Brushed & Tumbled Limestone tile is characterised by its warm creamy-beige tones, lightly brushed texture and softly aged edges. Delicately scattered with fossilised marine organisms, it adds unique natural detail and timeless charm to any setting.

This is an artisan crafted stone with tumbled edges and a brushed surface for an organic aesthetic.

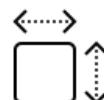

NOTE: Shade/batch variation is an inherent characteristic of all natural products. The colour of the material supplied may vary to samples/images provided.

INSTALLATION + CARE

Sealing may be required. We recommend Chemforce Stain Protector™.

For routine cleaning of internal natural stone surfaces we recommend Chemforce 5+5™ Enzyme Cleaner Concentrate.

For routine cleaning of external natural stone surfaces we recommend Chemforce Oxytec-M™ Oxygen Cleaner.

NOTE: Detailed technical data, installation and cleaning guides are available upon request.
