

Quartz is a hard, crystalline mineral commonly formed in geothermal waters. It is present in many igneous and metamorphic rocks, occurring when quartz-rich sandstone or chert has been exposed to high temperatures and pressures. Such conditions fuse the quartz grains together forming a dense, hard, equigranular stone.

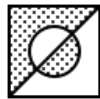

Sorrento Random Crazy Paving is characterised by a blend of greys, browns and golden tones.

This crazy paving is an artisan crafted stone with split edges and a split face surface for an organic aesthetic.

NOTE: Shade/batch variation is an inherent characteristic of all natural products. The colour of the material supplied may vary to samples/images provided.

FORMATS

Random sizes from 100mm to 600mm
Nominal thickness 20-25mm
Sold per cover meter
Allow a 10-25% wastage
Custom sizes available

APPLICATIONS

Interior Walls	Yes
Exterior Walls	Yes
Interior Floors	Yes
Exterior Floors	Yes
Splash Areas i.e. shower walls and splashbacks	Yes
Wet Areas i.e. shower floors, baths and pools	Yes
Countertop	-

INSTALLATION + CARE

Sealing may be required. We recommend Chemforce Stain Protector™.

For routine cleaning of internal natural stone surfaces we recommend Chemforce 5+5™ Enzyme Cleaner Concentrate.

For routine cleaning of external natural stone surfaces we recommend Chemforce Oxytec-M™ Oxygen Cleaner.

NOTE: Detailed technical data, installation and cleaning guides are available upon request.
