

Sandstone is a clastic sedimentary rock composed mainly of sand-sized and silicate grains. Comprising mostly of quartz sand, it can also contain amounts of feldspar and sometimes silt and clay.

Alba Loose Random Wall Cladding is characterised by light ivory tones with minimal amounts of colour change and movement.

This cladding is an artisan crafted stone with tumbled and rocky edges to achieve an organic and textural aesthetic.

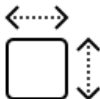

NOTE: Shade/batch variation is an inherent characteristic of all natural products. The colour of the material supplied may vary to samples/images provided.

FORMATS	APPLICATIONS	
Wall Cladding: Random sizes up to 400mm Nominal thickness 20-40mm	Interior Walls	Yes
	Exterior Walls	Yes
Corners: L shaped corner pieces Random sizes Nominal thickness 20-40mm	Interior Floors	-
	Exterior Floors	-
	Splash Areas i.e. shower walls and splashbacks	Yes
	Wet Areas i.e. shower floors, baths and pools	-
	Countertop	-
INSTALLATION + CARE		
<div> Sealing may be required. We recommend Chemforce Stain Protector™.</div>		
<div>For routine cleaning of internal natural stone surfaces we recommend Chemforce 5+5™ Enzyme Cleaner Concentrate.</div>		
<div>For routine cleaning of external natural stone surfaces we recommend Chemforce Oxytec-M™ Oxygen Cleaner.</div>		
NOTE: Detailed technical data, installation and cleaning guides are available upon request.
