

Marble is a metamorphic rock, formed when limestone is exposed to high temperatures and high pressure. The calcite in the limestone re-crystallises forming a denser stone.

Misty Grey wall cladding is characterised by a light to dark grey colouration and sweeping veining throughout.

This wall cladding is an artisan crafted stone with split edges and a split surface for an organic aesthetic.

NOTE: Shade/batch variation is an inherent characteristic of all natural products. The colour of the material supplied may vary to samples/images provided.

FORMATS

Wall Cladding:  
Random sizes up to 400mm Nominal  
thickness 20-40mm

Corners:  
L shaped corner pieces Random sizes  
Nominal thickness 20-40mm

APPLICATIONS

Interior Walls	Yes
Exterior Walls	Yes
Interior Floors	Yes
Exterior Floors	Yes
Splash Areas i.e. shower walls and splashbacks	-
Wet Areas i.e. shower floors, baths and pools	-
Countertop	-

INSTALLATION + CARE

Sealing may be required. We recommend Chemforce Stain Protector™.

For routine cleaning of internal natural stone surfaces we recommend Chemforce 5+5™ Enzyme Cleaner Concentrate.

For routine cleaning of external natural stone surfaces we recommend Chemforce Oxytec-M™ Oxygen Cleaner.

NOTE: Detailed technical data, installation and cleaning guides are available upon request.
