

Travertine is formed by the process of precipitation of calcium carbonate minerals from fresh water, typically in springs, rivers and lakes.

Sabbia Loose Random Wall Cladding is characterised by its unfilled travertine composition in warm, rosy and beige hues. Its natural variation and textural depth create an organic, timeless finish that enhances both interior and exterior walls.

This cladding is an artisan crafted stone with tumbled and rocky edges to achieve an organic and textural aesthetic.

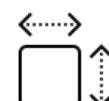

NOTE: Shade/batch variation is an inherent characteristic of all natural products. The colour of the material supplied may vary to samples/images provided.

	Countertop	-

### INSTALLATION + CARE

Sealing may be required. We recommend Chemforce Stain Protector™.

For routine cleaning of internal natural stone surfaces we recommend Chemforce 5+5™ Enzyme Cleaner Concentrate.

For routine cleaning of external natural stone surfaces we recommend Chemforce Oxytec-M™ Oxygen Cleaner.

NOTE: Detailed technical data, installation and cleaning guides are available upon request.
