

Travertine is formed by the process of precipitation of calcium carbonate minerals from fresh water, typically in springs, rivers and lakes.

Terra Travertine Loose Random Wall cladding is characterised by a blend of light to medium cream and linen tones. This durable stone withstands harsh weather and does not retain heat, making it the perfect choice in the Queensland and Northern NSW summer heat.

This cladding is an artisan crafted stone with tumbled and rocky edges to achieve an organic and textural aesthetic.

NOTE: Shade/batch variation is an inherent characteristic of all natural products. The colour of the material supplied may vary to samples/images provided.

Material
travertine

Finish
split face

Edge

FORMATS

Wall Cladding:
Random sizes up to 400mm
Nominal thickness 20-40mm

Corners:
L shaped corner pieces
Random sizes
Nominal thickness 20-40mm

APPLICATIONS

Interior Walls	Yes
Exterior Walls	Yes
Interior Floors	-
Exterior Floors	-
Splash Areas i.e. shower walls and splashbacks	Yes
Wet Areas i.e. shower floors, baths and pools	-
Countertop	-

INSTALLATION + CARE

Sealing may be required. We recommend Chemforce Stain Protector™.

For routine cleaning of internal natural stone surfaces we recommend Chemforce 5+5™ Enzyme Cleaner Concentrate.

For routine cleaning of external natural stone surfaces we recommend Chemforce Oxytec-M™ Oxygen Cleaner.

NOTE: Detailed technical data, installation and cleaning guides are available upon request.
