

Granite is a hard, coarse or medium-grained igneous rock that is rich in quartz and feldspar. It is the most common plutonic rock of the Earth’s crust, forming by the cooling of magma at depth.

Tora Mix Loose Random is characterised by its earthy colouration and greys throughout. Suitable for driveways, pathways, entrances and moree.

This cladding is an artisan crafted stone with tumbled and rocky edges to achieve an organic and textural aesthetic.

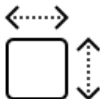

NOTE: Shade/batch variation is an inherent characteristic of all natural products. The colour of the material supplied may vary to samples/images provided.
